PRODUCT OVERVIEW

The rubber wheel stopper is designed to position vehicles correctly at the parking point and help reduce accidental contact with walls, columns and other structures. The selected MNSD product is a solid rubber wheel localizer with a black body and yellow reflective element.

TECHNICAL SPECIFICATION

PARAMETER	SPECIFICATION
Product	Rubber Wheel Stopper
Source / Manufacturer	MNSD, China
Material	Rubber
Colour	Black with yellow reflective element
Length	600 mm
Installation surface	Concrete / asphalt

APPLICATIONS

Basement parking • Shopping malls • Hospitals • Airports • Warehouses • Residential parking

L-SHAPE & ROUND-SHAPE

High-visibility impact protection for parking columns, walls and exposed corners

PRODUCT PURPOSE

Corner guards provide a protective barrier between vehicles and vulnerable parking structures. They are suitable for columns, corners and parking walls where vehicle contact may cause scratches, dents or concrete damage. Yellow/black high-visibility patterns improve driver awareness, particularly in enclosed parking areas.

KEY FEATURES

- Impact-absorbing rubber / protective profile
- High-visibility yellow and black appearance
- Suitable for parking columns and exposed corners
- Helps protect both vehicles and building surfaces
- Suitable for indoor, basement and commercial parking
- Mechanical fixing with anchor fasteners

COMMERCIAL USE

Basement & underground parking • Shopping malls • Hospitals • Hotels • Offices • Warehouses

PARKING PROTECTION SOLUTIONS
